10V10 would cry again. Nothing too revolutionary here, but a solid game for the price, I enjoy games that make fun of themselves.. I can't beat the second level.. 3 dollars for a useless, expensive in-game building that only serves a purpose for the mission it's attached to.. No easy way to disable the wallpaper. Had to completely shut down and uninstall on steam.

---

It's interesting type of game.. I would rather drag my balls through a mile of broken glass with Rosie O'donnells queef as my only air supply than play this game again. This game is just down right confusing you have no idea what your doing half the time. Short but hard 2D shooter with easy achievements.. A pretty chill puzzle game that will take up several hours of your time, with increasingly more challenging levels as you progress. It makes for a neat little game with mechanics that build upon each other slowly to keep things interesting the whole way through.. This game is really really good on the vive! It's nice with a seated game for a change as well. It's really well polished and the gameplay is absolutely amazing. This is a must have for VR. For 10 bucks this is a no brainer. Get it. So i saw this game recently and was fairly impressed, and was like what the hell so i bought it to support this one man Dev team and also play a fairly fun RTS.

Though the game has its bugs which all games do, the Dev is very receptive and is improving the game. It's enjoyable and pays homage to old school RTS in my opinion, so i'd recommend this game to anyone whos loves RTS. Simply an elegant game which has much potential. Excellent time period to study and play. Hours of good fun with this game!. This game doesn't even run offline. What is this, some kind of copy-protection? I'm sorry, but nobody is trying to pirate this game, I guarantee you.. It's...I'll give it a six out of ten: okay, but not perfect. And perhaps slightly below average, considering what goes for average in games these days (we're a spoiled bunch).

The good is easy to describe: the game looks good, handles very well and the soundtrack is amazing (though there's hardly any variety). I'd say that the first few levels you play will be very good (considering the price class of the game, obviously).

The problem...this is first and foremost an endless climber. The story mode is just tacked on (the radio messages are among the worst quality one's I've ever heard. I mean...I put more emotion in "my toast is burned" than the authors put in "everyone's dead"), but nonetheless something that'll keep you busy.

The endless climbing is where it's at. Though I'm not sure if I'm awesome at this game, or it just being really easy. I mean...even at playing "really hard" I felt more bored of playing the same levels than be given a challenge. So...not to sound demeaning, but I'd recommend this more to an inexperienced audience than an avid platformer.

And perhaps one strange question: why aren't there wall obstacles anywhere? I mean...I get that this isn't a vertical maze or something, but c'mon...shouldn't this be an obvious addition?
