## **About This Game**

Put on your wide-brimmed hat, grab your weapons and embark on an incredible adventure in the gothic-noir world of Borgovia, where mad science threatens the fragile peace between monster and mortal. Be Van Helsing, monster-hunter extraordinaire and save the day with your charming and beautiful companion, Lady Katarina (who happens to be a ghost, by the way). Explore the savage wilderness in the mountains and the soot-stained brick districts of a grim metropolis twisted by weird science, and don't forget: you might never know who the real monsters are!

## **Main Features**

- Enter a memorable gothic-noir universe filled with monsters, magic and weird science.
- Play through a refreshingly unique story, spiced up with wry humor and snappy dialogue.
- Fight fierce battles against supernatural foes with diverse skills and abilities.
- Use the special abilities and tailor the skills of your remarkable follower.
- Customize your character through a detailed level-up system where you decide which skills and abilities you'll need for the hunt.

- Modify your skills on the spot with a unique power-up system.

Good, casual, fun game. However, after you've invested a couple of hours into it the enemies start getting stronger and stronger and it becomes more of a trial and error. Tedious.

The only way to make it fun again is to make the purchases - buy the gems, the gold and purchase stuff. Upgrade your army so that you can finally make some progress again. Rinse & Repeat.

So in the end it's not really free unless you're okay with a few hours only.. A picture book 34 pages long.. could be more bats. <a href="https://voutu.be/5Wn9bB9Fad8">https://voutu.be/5Wn9bB9Fad8</a>

Boring, short (20min) uninspired 'horror' game. Decent atmosphere, that's about it.

Find stuff, unlock doors, run through the dark. No jump scares and barebones story. Pass.. Fun game, not nearly as difficult as Super Hexagon.

Lots of tricks you can abuse to bypass difficult sections due to what must be poor collision detection\/hitboxes for obstacles.

Overall enjoyed it, would recommend to Achievement Hunters and those who enjoy arbitrary reaction time based difficulty.. I played the game after the update and i didn't notice any bug, everything was perfect and i think there are more feedbacks and UI things, the voice acting was cool and the mechanics pretty enjoyable, i really recommend the game if you're an stealth fan, besides the boss fights are really something, specially if you are aiming to get the achievements (Ghost), most satisfying achivement ever!!!!. To start off the review I must say that I do very much so enjoy many things about this game, but dear lord the boss fights are harder than the Asylum Demon in Dark Souls. This isn't because of the insane difficulty, not in the slightest, but the vomit enducing rage generator aka the "Camera Controls". Or lack thereof. I could not play this game due to its horrid and miserly camera angles. During the second Borax fight you literally have to guess when you are being attacked and dodge accordingly. The camera is intentionally trying to screw you over more than the actual fight. But as far as the actual gameplay, it is quite engaging and is fun to play around a buddy or two. I personally loved the combo system and its fluidity was quite unmatched by other fighting zelda-like games, but it also has the downside of making the game too easy because it automatically counters the enemies. There is also this extremely annoying audio glitch that makes me want to slam my head in to a wall. I would rather cut off my ears like Van Gogh than have to listen to a rat/cat continously say "HEH, HEH, HEH, HEH, HEH" as though they were laughing at my inability to skip the thirtieth cutscene in a row featuring rats, bears, and cats OH MY! There are some strange quirks in that your character has a strange cat hole that causes an uncanny valley sort of feel. Some like that, but no says I. Also when wearing armor you a very unfortunately placed Ruby Gemstone where the "Crown Jewels" are supposed to be, if you catch my drift, Again, some like that, but no says I, In short, do not play, Although I do aspire to be as sassy as the first dragon you meet, he is the real OG.. So ummm.... this game is really good. I like that there are pink things and ummm lots of purple things too! I made my own princess at the start and I made her really pretty! She has long pink hair and a purple dress! I want to look just like her when I grow up. Ummmm... you run around and can do lots of things! Like, this one time, there was this really sad flower and it was all alone and I gave it some water and it wasn't sad anymore! This game is really good.

Sometimes, I wish I could go into my computer and play with my princess. She is really pretty. We can wear pink dresses and find sad plants and make them happy! Maybe one day I will grow up and be just like her. This game is really good.

I see lots of sad people and I wish I could be like my princess and make them happy. But people are not plants and I am not my princess. Maybe one day I will grow up and be pretty just like her and make the sad people happy. This game is really good.

- This game is clunky due to your firing rate being slow, the movement being slow, the lack of a strifing option and the enemies being bullet sponges
- Good luck trying to level up: It took me until mid second stage to even reach lvl 2. You'll probably be too poor to buy any upgrades by then either
- The framerate's clunky, the game's juvenile and the animations are quite cringeworthy.
- Level design: It's easy to get lost, and the indicator arrows don't help. Not to mention they're quite dull
- The polarity system in this game (red shots and blue shots) is unnecessary and so is the arena mechanic (which is made worse due to the clunkiness)

I tried to stomach the game and beat it, but it's just bad. Levels are tedious, gameplay's slow, and the RPG mechanics are tedious. The game looks bad as well. If there's anything good, I'd say the much is pretty decent for ambience. But that doesn't save the game. This game is about ninjas? Well leave it in the shadows and go play a good game released on the Neo Geo... like Shock Troopers, or Metal Slug.

Verdict: Do not buy. It's horrible in too many ways.. If you like a sandboxgame where you build industries and research new product and expand our businessempire this is game for you. There are competitors that sometimes compete with you so you have to sell at a lower price but you hardly compete with <a href="https://document.com/them.in/">https://document.com/them.in/</a> the latest uppdate the AI was improved so much so they never lose money or sell shares so some of the vinningconditions are no longer possible or at least extremely hard. Personally I prefere this before Rise of industry because here you build large idustrybuidings and uppgrade them rather than build a lot of small industies.. This is not a game, but it's a glimpse of what AAA game in VR will look like in a few years. It is also a glimpse of what VR can look like when there is a solid art direction.

It's free, and it is not an assembly of cheap or free unity assets like 80% of the VR market right now...

And those who were expecting a game, Eidos had said before mankind divided release that it will be just that, looking at well built scenes in VR.... Part room escape, part short story, inspired by terrifyingly true events. Short playtime, but highly polished. I am excited to see what comes from these devs next!. I find this game excellent .

I have been playing for some time now and are a learn as you go (trial & error) player and find it a great way to creat your own city, countryside, farmland, etc.

I recomened this game to anyone with great imagination.. full of bugs on coop. but very nice on single player. For now I'm giving this game a thumbs up but only for die-hard tycoon fans like me who don't expect much value yet who mainly want to support the developer so he can continue working on the game. For everyone else please consider this review a thumbs down.

The game currently is not bad, but it's not good either. It's somewher inbetween. You can currently choose to play sandbox in either a small market or a somewhat larger one. There are about half a dozen shelve types, fridges and one freezer and a few cashier points you can build and almost 100 items you can stock your shelves and fridges with.

The game is in a really early state and you can immediately tell after playing for a short time. It has quiet a few bugs although the game just released today, so the dev's might be able to fix many of the bugs in the comming days. The game currently doesn't offer too much playtime yet as it's too barebones and lacks certain features which one would expect from such a tycoon game.

But it's early access and in my opinion it shows great promise and has a really good foundation. Whether or not the game will become really good depends on how well the development will continue.

So if you are a die hard tycoon fan and would like to support the devs and test the game for them and see how it developes then buy it now. Otherwise check back in a month or two or maybe later to see how the game progress.

I have played my fair share of really bad tycoon games but this one is off to a good start and can become a great game if development is done right.
